RAVENOL HJC Hybrid Japan.Coolant HOT CLIMATE -15°C is a ready to use, prediluted with water, ethylene-glycol based and time-tested coolant without amines and silicates. This product is formulated based

on a proven inhibitor development as an extended life radiator antifreeze.

The quality of an antifreeze is no longer just determined by the antifreeze effect (which automatically exists in an ethylene-glycol based product), but by the rust protection.

That is why automakers subject antifreeze to lengthy corrosion and cavitation tests.

RAVENOL HJC Hybrid Japan.Coolant HOT CLIMATE -15°C protects the cooling system from rust, frost, and in summer, from overheating.

Application Note

RAVENOL HJC Hybrid Japan.Coolant HOT CLIMATE -15°C is a prediluted coolant with frost and rust protection for year-round use in automotive engines.

Even in summer coolant must contain enough antifreeze to ensure good corrosion and overheating protection.

Instructions: Add **RAVENOL HJC Hybrid Japan.Coolant HOT CLIMATE -15°C** to radiator to fill line.

Characteristics

- Excellent for light metal engines
- Good reserve alkalinity
- High-quality corrosion additives for optimal corrosion protection
- Elastomer compatible with elastomers used in automotive radiators

Characteristics

Title	Value	Audit
Համապատասխանում է արտադրողի պահանջներին	Ford WSS-M97B55, Mazda FL22 Coolant, Subaru coolant 16218, Suzuki Longlife Coolant	
Density at 20 °C	1047 kg/m ³	EN ISO 12185
Գույն	Green	տեսողական
pH - value	7 - 8.5	ASTM D1287
Սառեցման կետ	-15 °C	ASTM D1177
